Screenprint Classes

Intro to Vera's Screenprint Studio (SP 101)

This 2-hour, comprehensive hands-on class teaches you the basics of screen printing, troubleshooting, working with fabric and paper, and basic registration. Get comfortable with Vera's shop layout, equipment, and culture. Learn about techniques for creating screens, terminology, and techniques to be employed in entry level printing projects in a printshop. Bring your own cotton t-shirt and take some VERA merch home with you! This class is also the prerequisite for 200 level screenprint classes and access to Vera's Screenprint Studio Open Sessions.

Cost: \$35

Pre-requisites: None

Capacity: 12

Poster Printing (SP 201)

Show posters, art prints, and flat-stock paper print projects, galore! In this hands-on workshop, students will learn about the basics of color separation, print registration, proper equipment use, and helpful tips to successfully run a series of prints in a DIY or professional studio. Students must complete Screenprint 101 before attending this class.

Cost: \$35

Pre-requisites: SP 101

Capacity: 8

Fabric Printing (SP 202)

Do you dream of people wearing your artwork out on the streets? Want to make shirts for your band? Learn how to print on cotton t-shirts and other fabric materials in this next level screen print class! In this hands-on workshop, explore the concepts of printing with different styles of fabric and ink, and learn how to properly set up a t-shirt print job. Students must complete Screenprint 101 before attending this class.

Cost: \$35

Pre-requisites: SP 101

Capacity: 8

Private Screenprint Classes

Our classes are so popular that they advertise themselves! You can book a private class for your non-profit, community organization, group of friends, company, band, everyone living in your communal house, or your book club – we are open to anything. Maximum class size is 15.

Live Sound

Basics of Live Sound (LS 101)

Sound 101 is both an introduction to live audio engineering and an orientation to Vera Project's methods and equipment. Topics covered include an introduction to signal flow using a PA and analog mixer, microphones and mic placement, stands, cables, stage equipment, and etiquette for working with artists. This class is the start of Vera's live sound training pipeline and volunteering for Sound Runner shifts at Vera shows.

Cost: \$35

Pre-requisites: None

Capacity: 12

Small PA (LS 201)

This workshop is designed to acquaint students with a small PA system. Small PAs are generally used for band practices, acoustic sets, DJ sets, poetry readings, protests, or even house shows and shows in Vera's gallery space!). Topics will include: speaker set up and placement, signal flow, setting up turntables, using EQ to 'ring out' a room, and mixing for small room shows. By completing this class you are eligible to rent PA systems from The Vera Project and volunteer as a Gallery Engineer.

Cost: \$35

Pre-requisites: LS 101

Capacity: 8

Mixing for Monitors (LS 202)

Creating a good monitor mix is one of the most important skills for a live sound engineer to accomplish. Using the basics of the Sound 101 and Small PA class, this hands-on workshop will introduce you to stage monitors, the basic 'ringing out' of monitors, EQing, and setting levels using Vera's digital monitor mixing board. The use of these techniques will allow you to create a clear monitor mix that will help performers be at their best. By taking this class, you are eligible to volunteer as a Monitor Engineer at Vera shows!

Cost: \$35

Pre-requisites: LS 201

Capacity: 8

Front of House Mixing (LS 301)

This is the exciting, concluding class of Vera's Live Sound series! Mix a live band performance in a low pressure environment, starting with the basics of mixing at the front of house board. By the end of this workshop you will learn: how to set up a mix in a mid-sized venue, preamps, EQ settings, mixing styles, sound pressure levels, advanced outboard gear techniques, and tips for listening critically to live sound. Students must complete Vera's Sound 202 workshop before attending this class, and are highly recommended to have volunteer experience with Vera gallery and monitor engineering.

Cost: \$55

Pre-requisites: LS 301

Capacity: 8

Private Live Sound Classes

You can book a private class for your friends, your classmates, your high school jazz band, ...whatevs. You can book time to take any one or all of the classes we offer, or talk to us and our talented teaching staff can tailor one to your specific needs. Maximum class size is 15.

Recording Studio Classes

Recording Studio Workshop Series

A six-week series of sequential classes, Vera's recording workshop series covers a recording session from start to finished product. Beginning with the basics, our professional studio engineers will explain Vera's Recording Studio mixing board, signal flow, navigating and tracking in ProTools HD, and standard microphone techniques as well as studio etiquette, organization and maintenance. From there, this hands-on workshop will teach you the process of setting up, tracking, and engineering with one or more local artists. Other subjects include a deeper look at all of the topics covered in the Live Sound 101 class with an emphasis on microphone techniques, signal flow, and critical listening.

Cost: \$455 LS 101 recommended for people new to audio equipment and concepts Capacity: 6

Stage Classes

Intro to Concert Lighting

Intro to Concert Lighting will introduce the basics of stage lighting. The class will focus on learning how to light performers on the Vera stage. Students will learn about different lighting instruments, how to hang and focus lights, as well as basic lighting console operation. A chance to control the lights to music and program your own chase will be an exciting activity that can't be missed by anyone. With interactive demonstrations students will have a practical grasp on lighting systems at the conclusion of the class. In addition, participants of the class can expect to gain basic fundamental knowledge of working with artists and their lighting needs. If you're interested in harnessing the power of Vera's lighting, then this is the class for you.

Cost: \$35 Pre-requisites: None Capacity: 4

DJ Workshop Series

A beginner-to-intermediate course where students will learn the basic DJ skills using Traktor software and controllers, be provided with software for home practice, and hone their skills before and during Vera Project main stage shows once they've completed the full course.

Online Classes

Basics of Live Streaming

Play your first bedroom pop gig from your actual bedroom, or host a game night remotely with your friends! In this 2-hour video call workshop, you'll be introduced to free and open-source tools to live stream on Facebook or YouTube. Learn from the production team behind VERA's Live From Our Living Rooms stream, on topics such as: producing live audio, live and recorded videos, managing overlays, and more!

Zine Making 101

Get your art and ideas into the world with zines. We'll look at zine history, structure options, topics and distribution. We will walk through the printing process and students will have the option to get 28 copies of their own two-color risograph, 8 page + cover mini zine. Students will work with the instructor through concept, development, and execution.

MonoMerch: Embroidery & DIY Culture

This class series is an avenue for creation and community, through lenses of DIY application and self care. Students will participate in group discussions, instructor presentations and own time activities in and outside of class with the opportunity to share progress. Starts with the fundamentals of embroidery which will set the foundation for any needlework project. Assignments will challenge students to imagine different kinds of merch, the various applications and possibilities with the medium of needlework. In the end students will have embroidered pieces for themselves or to share with their communities.

Audio Production with Reaper

In this 6-week course you will learn the basics of the professional audio production software Reaper by working collaboratively with other students and the instructor to make original compositions. You will also learn how to utilize free file sharing resources, download and activate free effects plugins, mix a song, and add sound to video. You will receive pre-recorded instructional videos, audio resources (ie. unmixed drum tracks, effects downloads, etc.), and participate in a classroom Q and A with Jak: founder/operator of Whalehouse Studio Cooperative.

Music Mixing and Mastering

Learn basic to advanced concepts and techniques of music mixing and mastering in an in-the-box, DAW oriented environment. This 3-week course will focus on session organization, tone shaping, and creative mixing techniques, utilizing a variety of approaches to give students a well rounded experience of the different ways and methods to mix music.
